

Employee Login Notification Dialog

Below is screen shot of login notifications, this display appears on initial login.

It builds a list of the items you need to be notified of. You can click view to open those panels.

If you click Acknowledge it will clear all flags

If you click Cancel it exits and next login they will appear again.

Setup

You will have to look up all profiles, and at click save on each (you don't need to select anything) but there is a new security module and saving builds the reference.

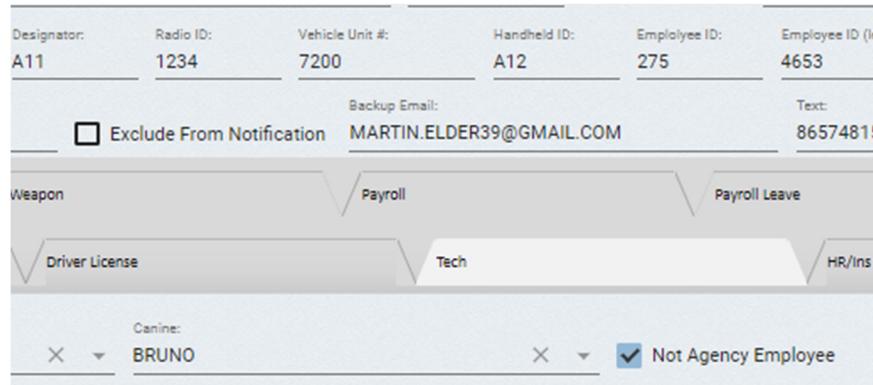

How the notifications work

In each of the modules listed above, as you add a new record it will fire an update to employees that have View access to the modules + have not been marked explicable on their Profile And/or Profile Module to be excluded from push notifications.

The employee will be excluded initially on a few settings on their employee records

Excluded if: Terminated Date is populated

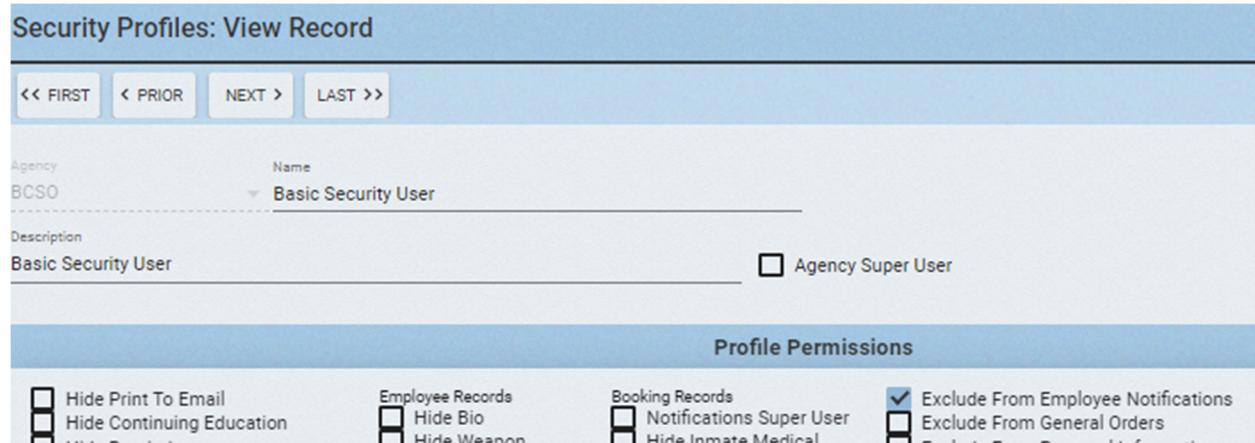

Excluded if: Non-Employee is checked on the TECH tab in employee records. Used if you give someone outside your agency direct login to your agency data.

This screenshot shows an employee record detail view. At the top, it lists basic information: Designator (A11), Radio ID (1234), Vehicle Unit # (7200), Handheld ID (A12), Employee ID (275), and Employee ID (4653). Below this, there is a 'Backup Email' field containing 'MARTIN.ELDER39@GMAIL.COM'. A checkbox labeled 'Exclude From Notification' is unchecked. The 'Payroll' tab is selected, showing a 'Text' field with '86574815'. Below the tabs, there are sections for 'Weapon', 'Payroll', 'Payroll Leave', 'Driver License', 'Tech', and 'HR/Ins'. Under 'Tech', there is a 'Canine' field with 'BRUNO' and a dropdown menu. A checkbox labeled 'Not Agency Employee' is checked.

Excluded from **all** notifications if: The security profile is marked as Exclude from Employee Notifications.

This is on each profile (4th column in image below)

This screenshot shows a 'Security Profiles: View Record' page. At the top, there are navigation buttons: '<< FIRST', '< PRIOR', 'NEXT >', and 'LAST >>'. The profile details are as follows: Agency (BCSO), Name (Basic Security User), Description (Basic Security User), and a checkbox for 'Agency Super User' which is unchecked. Below this, there is a 'Profile Permissions' section with several checkboxes. The checked boxes are: 'Exclude From Employee Notifications' and 'Exclude From General Orders'. Other options include 'Hide Print To Email', 'Hide Continuing Education', 'Employee Records', 'Hide Bio', 'Hide Weapon', 'Booking Records', 'Notifications Super User', 'Hide Inmate Medical', and 'Print To Email'.

You can also exclude push notifications by Profile/Module

Example below shows the Basic Security Profile can view bolo, but does not want to be notified if new ones are entered.

Description
Basic Security User Agency S
